Follow Other Tickers

Follow the news of your favorite categories, people, companies, and networks. Collect Your Favorite News Under One Feed.

Build Your Ticker

“Tic” or post news, photos, and videos that are most relevant and newsworthy to you.

Add Friends

Follow your friends’ news tickers and share your ticker with them.

Embed

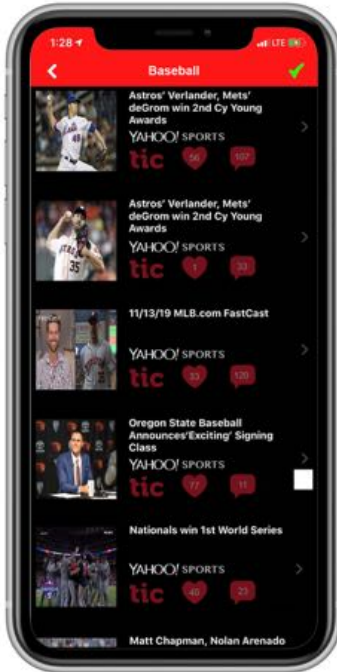

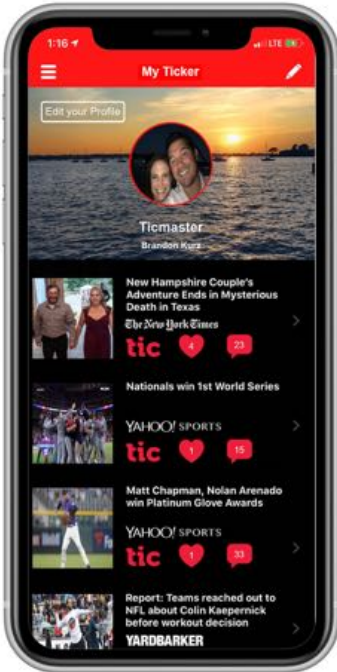

Embed your Ticker to the top of your website so that your latest and greatest tics will be displayed visibly and clearly to your network. Interact with each “Tic” directly from your desktop - you can read articles, watch videos, view photos and much more...

Enhanced Television Tickers

Ever see the end of a blurb on a ticker of your favorite sports or news channel, but you couldn't rewind your television to see the rest?

Now, because of Ticker and Smart Television you can direct your TV changer to select "Tics" on the Ticker on the bottom of your screen and display each "Tic". You can read articles, watch videos, view photos, and much more. You can choose between regular programming on each network or scroll through the "Ticker" to find what you want to watch.
